Superior Image Quality
High Dynamic Range

**The Varex Imaging XRD 1622 Flat Panel X-ray Detectors are the part of the Varex Imaging family of 16-inch (41 cm) field of view amorphous silicon (a-Si) digital X-ray FPDs.**

OVERVIEW

Two models of the Varex Imaging XRD 1622 digital Flat Panel X-ray Detectors (FPDs) are available: The Varex Imaging XRD 1622 AO provides over 74 dB of dynamic range and 1 frame per second (fps). The enhanced performance Varex Imaging XRD 1622 AP offers over 87 dB of dynamic range and frame rates up to 4 fps via multiple read-out modes. Both detectors support a broad range of energy levels from 20 kV – 15 MV and are available with several shielding and scintillator options.

Rapid system integration is accomplished via Gigabit Ethernet data communication, integrated trigger and X-ray synchronization circuitry, and a comprehensive software library for image acquisition and processing.

The wide energy range, variable frame rates and shielding options allow the Varex Imaging XRD 1622 to meet the component requirements of applications[1] such as industrial non destructive testing, radiation therapy for cancer treatment, as well as veterinary and life and physical science.
